SUMMARY

Computer Science (AI) student experienced in building LLM applications, RAG pipelines, AI agents, and ML systems using Python, PyTorch, LangChain, and FastAPI with strong foundations in DSA, OOP, and system design.

EDUCATION

B.Tech CSE (Artificial Intelligence)	2028
Amrita Vishwa Vidyapeetham	85%
Sri Chaitanya Junior College	2024
Intermediate Education	90.2%

SKILLS

Languages	Python
AI/ML	NumPy, Pandas, scikit-learn, PyTorch, CNNs, Hugging Face Transformers
LLM	OpenAI API, RAG, LangChain, LangGraph, FAISS, ChromaDB, Prompt Engineering
Tools	Git, GitHub, FastAPI, Docker, AWS
Concepts	DSA, OOP, REST APIs, System Design, Databases

EXPERIENCE

Full Stack Developer Intern	Apr 2026 – Jun 2026
Viyatus Technologies Private Limited	

- Reduced dashboard latency by optimizing Angular components and Spring Boot APIs, improving production application performance and user experience.
- Delivered 3 production features by developing REST APIs with Spring Boot, MongoDB integration, and Bitbucket CI/CD deployment workflows.
- Improved engineering workflows by documenting architecture decisions and collaborating with teams to deliver scalable software solutions.

Conversational Data Analysis with LLMs Intern	Sep 2025 – Oct 2025
AICTE & VOIS for Tech	

- Built LLM-powered conversational analytics workflows enabling natural language interaction with structured datasets and automated insights.
- Improved AI response quality through prompt engineering techniques and Large Language Model reasoning workflows.

PROJECTS

Enterprise Multi-Agent AI Workflow Platform	Feb 2026 – Jun 2026
--	---------------------

- Improved automation efficiency by 60% by developing multi-agent workflows using LangGraph, LangChain, and OpenAI API integrations.
- Increased AI response accuracy by 35% using RAG pipelines, agent memory, FAISS retrieval, and ChromaDB vector storage.

Production RAG Knowledge Engine	Jul 2026 – Oct 2026
--	---------------------

- Improved document QA accuracy by 45% by designing optimized RAG pipelines with embeddings, chunking, and semantic search.
- Reduced hallucinations by 35% using retrieval evaluation, ranking strategies, and LLM evaluation techniques.

CERTIFICATIONS

Google AI Essentials V1 — Coursera (2026)
